

# NHAN H. PHAM

nhanph.github.io ◇ nhan.ph0407@gmail.com ◇ (775)-501-2570

## RESEARCH INTERESTS

- ◇ Stochastic methods for machine learning, deep learning, reinforcement learning, and federated learning
- ◇ LLM-based solutions for enterprise data management applications

## EDUCATION

<b>Ph.D. in Operations Research</b> <i>Department of Statistics and Operations Research</i> <i>University of North Carolina at Chapel Hill · Chapel Hill, NC, USA</i>	2017–2021
<b>Graduate Study in Computer Engineering</b> <i>Department of Computer Science and Engineering</i> <i>University of Nevada, Reno · Reno, NV, USA</i>	2015–2017
<b>Bachelor of Engineering (Honor Program) in Computer Engineering</b> <i>Department of Computer Science and Engineering</i> <i>Ho Chi Minh City University of Technology · Ho Chi Minh City, Vietnam</i>	2008–2013

## INDUSTRY EXPERIENCES

<b>Staff Research Scientist</b> <i>IBM Research, Thomas J. Watson Research Center · Yorktown Heights, NY</i>	2024–Present
<b>Research Scientist</b> <i>IBM Research, Thomas J. Watson Research Center · Yorktown Heights, NY</i>	2022–2024
<b>Summer Machine Learning Intern</b> <i>Blue River Technology Inc. · Sunnyvale, CA</i>	2021
<b>Summer Research Intern</b> <i>IBM Research, Thomas J. Watson Research Center · Yorktown Heights, NY</i>	2020

## RESEARCH EXPERIENCES

<b>Automation for Enterprise Data Management</b> <i>Building an end-to-end system for text-to-SQL using Large Language Models (LLMs).</i>	Dec. 2023–Present
<ul style="list-style-type: none"><li>◇ Experiments with both in-context learning and finetuning LLMs for individual tasks such as schema linking and SQL generation.</li><li>◇ Curate training and evaluation datasets from open-source and enterprise usecases.</li><li>◇ Develop reasoning capability for text-to-SQL models.</li><li>◇ Achieved top ranking on BIRD leaderboard.</li><li>◇ Core developer of NL2Insights: an automated pipeline for text2SQL.</li><li>◇ Enable Text2SQL service in IBM watsonx.data intelligence.</li></ul>	
<b>Table metadata to business glossaries mapping</b> <i>Leveraging large language models (LLMs) to design generic methods for matching table metadata with business glossaries.</i>	2023–Jan. 2024
<ul style="list-style-type: none"><li>◇ Leverage Large Language Models (LLMs) to design generic matching methods that do not require manual tuning and can identify complex relations between column names and glossaries.</li><li>◇ Propose methods that utilize LLMs in two ways: generating additional context for column names that can aid with matching and using LLMs to directly infer if there is a relation between column names and glossary description.</li><li>◇ Experimenting with different reward functions for reinforcement learning (RL) fine-tuning for Column-to-Concept mapping use-case.</li></ul>	
<b>Automated Decision Optimization</b> <i>An end-to-end automated system to solve sequential decision-making problems.</i>	Jan. 2022–Mar. 2023
<ul style="list-style-type: none"><li>◇ Design the application framework and system architecture for data and knowledge-driven Automated Decision Optimization ((AutoDO)).</li><li>◇ Demonstrate, benchmark, and experiment for effectiveness and solution quality from AutoDO.</li><li>◇ AutoDO is available on IBM API Hub portal.</li></ul>	

### **Evaluating Robustness of Cooperative MARL: A Model-based approach**

Jul. 2021–May 2023

Joint work with: Dr. Lam M. Nguyen, Dr. Jie Chen, Dr. Hoang Thanh Lam, Dr. Subhro Das, and Dr. Tsui-Wei Weng.  
Accepted for the 2023 IEEE International Conference on Data Mining (ICDM), [eprint](#).

- ◇ Propose the first model-based adversarial attacks, called cMBA, for cooperative multi-agent reinforcement learning by solving a constrained nonconvex optimization problem at every timestep.
- ◇ Propose a new victim agent selection strategy which has not been considered in previous works.
- ◇ Conduct experiments on multi-agent MuJoCo environments.

### **Federated Learning with Randomized Douglas-Rachford Splitting Methods**

Aug. 2020–Jun. 2021

Graduate Research Assistant, Supervisor: Dr. Quoc Tran-Dinh, Dr. Lam M. Nguyen.  
Accepted for the 35th Conference on Neural Information Processing Systems, [eprint](#).

- ◇ Propose two new algorithms, FedDR and asyncFedDR, to solve finite-sum nonconvex problems in federated learning by combining Douglas-Rachford splitting, randomized strategy, and asynchronous update.
- ◇ Achieve best-known communication complexity and handle data heterogeneity.
- ◇ Conduct experiments on federated learning examples using synthetic and real datasets.

### **Regression Optimization for System-level Production Control**

Jun. 2020–Aug. 2020

IBM Research Intern, Supervisor: Dr. Roman Vaculin, Dr. Dzung T. Phan, Dr. Lam M. Nguyen.  
Accepted for the 2021 American Control Conference (ACC).

### **Stochastic Gauss-Newton Algorithms for Nonconvex Compositional Optimization**

Sept. 2019–Feb. 2020

Graduate Research Assistant, Supervisors: Dr. Quoc Tran-Dinh, Dr. Lam M. Nguyen.  
Accepted for the 37th International Conference on Machine Learning, [eprint](#).

- ◇ Propose two new Stochastic Gauss-Newton algorithms to solve stochastic nonconvex compositional problems that use both classical stochastic and SARAH estimators for function values and Jacobian estimators.
- ◇ Give first stochastic Gauss-Newton algorithm with global complexity analysis.
- ◇ Conduct numerical experiments on two examples: stochastic nonlinear equations and asset allocation problem.

### **Regularization Techniques on Deep Learning**

Sept. 2019–Dec. 2019

SAMSI Research Fellow, Supervisor: Dr. Quoc Tran-Dinh.

- ◇ Study the principle of different regularization techniques on training Deep Neural Networks (DNNs).
- ◇ Conduct numerical experiments on different DNN models consisting two or more regularizers on both model parameters (e.g.,  $\ell_2$ -norm, max-norm constraint, etc.) and training process (dropout, batch normalization, etc.).

### **Hybrid Stochastic Policy Gradient Algorithm for Reinforcement Learning**

Jul. 2019–Dec. 2019

Graduate Research Assistant, Supervisors: Dr. Quoc Tran-Dinh, Dr. Lam M. Nguyen.  
Accepted for the 23rd International Conference on Artificial Intelligence and Statistics (AISTATS 2020), [eprint](#).

- ◇ Propose new biased policy gradient estimator from REINFORCE/GPOMDP and adopted SARAH estimators and use it to derive first algorithm that has convergence guarantee to solve a composite policy optimization problem in reinforcement learning.
- ◇ Prove proposed algorithm achieves best-known convergence rate over existing methods and conduct experiments to verify the advantage using OpenAI gym environments.

### **Hybrid Optimization Framework for Composite Nonconvex Optimization**

Feb. 2019–Aug. 2019

Graduate Research Assistant, Supervisors: Dr. Quoc Tran-Dinh, Dr. Lam M. Nguyen.  
Accepted for Mathematical Programming, [eprint](#).

- ◇ Introduce a new stochastic gradient estimator that combines SGD and SARAH estimators and use it to develop a new algorithm for composite nonconvex optimization problems which achieves best-known convergence rate.
- ◇ Verify the effectiveness of the proposed algorithm via numerical experiments using Python and Tensorflow.

### **ProxSARAH: A Framework for Stochastic Composite Nonconvex Optimization**

Aug. 2018–Feb. 2019

Graduate Research Assistant, Supervisors: Dr. Quoc Tran-Dinh, Dr. Lam M. Nguyen.  
Accepted for Journal of Machine Learning Research (JMLR), [eprint](#).

- ◇ Develop new stochastic algorithm for composite nonconvex optimization problems which utilizes existing SARAH estimator and achieves the best-known convergence rate.
- ◇ Conduct numerical experiments to illustrate advantage of proposed algorithms on three examples: Non-negative PCA, classification with 3 nonconvex losses, and neural network training using Python and Tensorflow.

Graduate Research Assistant, Supervisor: Dr. Hung M. La.

In *Proceedings of the 54th Annual Allerton Conference on Communication, Control, and Computing*, [eprint](#).

In *Proceedings of the 2017 IEEE International Conference on Robotics and Automation (ICRA)*, [eprint](#).

*The 33rd International Symposium on Automation and Robotics in Construction and Mining (ISARC)*, [eprint](#).

- ◇ Propose four-wheeled robot for steel bridge inspection with permanent magnets embedded inside each wheel equipped with different type of sensors: visual camera, 3D sensor, IMU for localization and mapping purposes.
- ◇ Build controller unit with minicomputer (Intel NUC) running Robot Operating System communicating with low-level controller (Arduino-based) for sensory data collection, implement sensor fusion and mapping algorithms.

## TUTORIALS/LAB

**AAAI 2023 Tutorial and Lab Organizer** Feb. 2023  
**Title:** *Automated AI For Decision Optimization with Reinforcement Learning.*

## INVITED TALKS

**MIT-IBM Guest Seminar** Jul. 2021  
**Title:** *Stochastic Recursive Gradient Algorithms for Stochastic Composite Nonconvex Optimization and Policy Optimization.*

**INFORMS Annual Meeting 2020 Virtual** Nov. 2020  
**Title:** *A Hybrid Stochastic Policy Gradient Algorithm for Reinforcement Learning.*

**INFORMS Annual Meeting 2019 Seattle** Oct. 2019  
**Title:** *ProxSARAH: An Efficient Algorithmic Framework for Stochastic Composite Nonconvex Optimization.*

## SKILLS & QUALIFICATIONS

<b>Technical</b>	Python, Tensorflow, Keras, Pytorch, Scikit-learn, C/C++, Matlab, Data Structures & Algorithms
<b>Other skills</b>	Linux Development Environment, Robotics, Embedded Systems

## HONORS & AWARDS

**IBM Outstanding Technical Achievement Award** 2026  
*NL2Insights Impacting Products and Clients*

**IBM Growth Award** 2025  
*Advancing Text2SQL service within watsonx.data intelligence*

**IBM Research Accomplishments** 2025  
*NL2Insights: Product and Client-0 Adoption & Impact (A-level)*

<b>IBM Outstanding Technical Achievement Award</b> <i>IBM Granite Text-to-SQL: BIRD Leaderboard First Place</i>	2025
<b>IBM Research Accomplishments</b> <i>IBM Granite Fine-tuned Text-to-SQL Models Sweep Top Spots in BIRD Leaderboard (A-level)</i>	2024
<b>IBM Research Pat Goldberg Memorial Best Paper</b> <i>IBM Research</i>	2022
